Snowflake Ecosystem

Snowflake works with a wide array of industry-leading tools and technologies, enabling you to access Snowflake through an extensive network of connectors, drivers, programming languages, and utilities, including:

- Certified partners who have developed cloud-based and on-premises solutions for connecting to Snowflake.
- Other 3rd-party tools and technologies that are known to work with Snowflake.
- Snowflake-provided clients, including [SnowSQL](#) (command line interface), connectors for [Python](#) and [Spark](#), and drivers for [Node.js](#), [JDBC](#), [ODBC](#), and more.

RESOURCE: Snowflake Partners Web Page

Take a look at the Snowflake's Web page that talks about Partners.

Partners that develop software or SaaS options are called Technology Partners.

Snowflake has a second kind of partner, listed on the Partners web page. Visit this page and scroll down to read about Solutions Partners.
